## EXPERIENCE

---

### Software Developer

March 2025 – February 2026

*Infusyx Services*

*Pune Maharashtra*

- Developed and maintained full-stack features using React.js, Next.js, Node.js, Express.js, and PostgreSQL.
- Built RESTful APIs using Node.js Express.js with JWT authentication, role-based access control, and secure workflows.
- Reduced runtime errors through strict TypeScript type enforcement and consistent code review practices.
- Enhanced application performance using code splitting, lazy loading, and component-level optimizations for faster load times and smoother UX.
- Optimized PostgreSQL queries and indexing strategies to improve database performance and API response times.
- Debugged and resolved production issues, improving application stability and overall user experience.

## PROJECTS

---

### Job Portal Web Application | [Live Link](#) | [GitHub-Code](#)

- **Tech Stack:** Next.js, Node.js, Express.js, PostgreSQL, JWT, Bcrypt, Axios, Tailwind CSS
- Built full-stack job portal with role-based authentication (User/Admin) supporting job postings, applications, and candidate tracking.
- Developed secure RESTful APIs with JWT token-based authentication and password encryption using Bcrypt.
- Designed responsive UI with Next.js, Tailwind CSS & Shadcn optimizing for mobile and desktop experiences.
- Integrated PostgreSQL database for reliable relational data management and optimized backend queries for performance and scalability.

### Sales CRM Platform | [Live Link](#) | [GitHub-Code](#)

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, Bcrypt, Axios, Recharts, Tailwind CSS
- Developed a full-stack Sales CRM platform enabling teams to manage leads, deals, and activity history through a structured sales pipeline.
- Designed and implemented a Lead Management system with advanced search, status-based filtering, pagination, and automated lead assignment.
- Engineered a Deal Pipeline module supporting stage tracking (Prospect, Negotiation, Won, Lost) to monitor deal progression and revenue opportunities.
- Built an Activity Tracking module for logging calls, meetings, notes, and follow-ups linked to specific leads.
- Created a dynamic Dashboard with aggregated metrics, bar and pie charts for sales insights using optimized MongoDB aggregation queries.
- Optimized backend performance using database indexing, lean queries, and efficient aggregation strategies.
